

Contribute to
our research project on the links
between biodiversity and health

BioRodDis: A European scientific project

Our research questions

- Which **diseases** are related to rodents?
- What are the factors that favour their **transmission** to humans ?
- How can we improve the **prevention** of rodent-borne diseases ?

The contribution of park and forest users

Complete our online questionnaire to help us:

- Identify the places, publics and activities concerned by rodent borne diseases

- Assess the knowledge of rodents and related diseases
